

Meseta Cremaccino

CREMACCINO is the simple and innovative way to prepare your cappuccinos and lattes. This unique cream maker is versatile in allowing you to easily warm up your milk and produce rich thick milk froth for cappuccinos and lattes without the mess of frothing milk. Provides Warming, Frothing or both functions with a press of the button. Reliable safety and practical convenience features include the cool touch plastic housing, built in thermostat, automatic switch-off system with a transparent lid. Easy to read indicator light informs you of temperature and operational mode. Now you can allow Meseta Cremaccino to make your perfect milk foam and save you time and energy. Rich piano black finish.

Additional features include:

- Removable 360 degree cordless (detachable non slip base) with easy to clean design and an ergonomically molded comfort grip rubber handle
- Max capacity 650ml. Milk frothing capacity: 200ml. Milk warming capacity 600ml. Produces perfect milk foam in under 90 seconds
- Variety of settings include Warm or Froth only or Both functions simple control with the press of a button. Automatic switch off system with transparent lid and cool touch plastic housing add to the safety and ease of operation
- Food grade non-stick coating in the cup with a red indicator light.
- Keeps the milk at warm temperature of 150F degrees.
